TRANSMITTAL LETTER FOR SEQUENCE LISTING DISC

July 21, 2008
[July 20, 2008 = Sunday]

United States Patent and Trademark Office
Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Dear Sir:

Applicants submit herewith a substitute sequence listing on compact disc in compliance with the Notification of Defective Response.

The disc was created on July 17, 2008, and contains identical information as provided in the substitute paper copy of the originally international application, which are being submitted to include the numeric identifier "<220>" and the numeric identifier and comment "<223> Synthetic Construct" in order to comply with 37 CFR §1.823. A paper copy of the substitute Sequence Listing is attached.

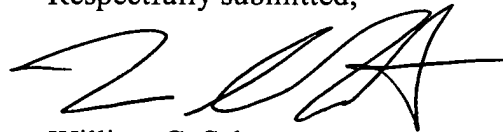

All files in the substitute Sequence Listing disc are in ASCII format in compliance with 37 C.F.R. §1.52(e). No new matter is being submitted. The files submitted are as follows:

<u>File Name:</u>	<u>Size in Bytes:</u>	<u>Date of Disc Creation:</u>
3514 115 ST25rev-2.txt	4,436	July 17, 2008

All data is in uncompressed form. The files may be accessed with an IBM compatible computer, preferably having a 200 MHz or faster Pentium or AMD processor, and running one of the following operating systems: Microsoft Windows 98, Windows 98SE, Windows ME, Windows NT, Windows 2000, or Windows XP. The inventors, title of the invention, application number and date of disc creation are indicated on the disc.

All information on the Sequence Listing disc was previously submitted at the time of initial filing of application No PCT/US03/034511 on October 30, 2003, as well as in response to the Notification of Missing Requirements. The substitute Sequence Listing has only been amended to include the numerical identifiers <220> and <223> and comment "Synthetic Construct" pursuant to USPTO rules. No other revisions have been made. No new matter is being added by this submission.

Respectfully submitted,

William C. Schrot
